

**Dear Sir or Madam**

*I worked for a decade in the Financial Sector (NBG Group), but I have also gained an equal experience as an Application Architect and/or Technical Consultant working for a wide range of Web-based projects.*

*During my career, I have applied a wide range of development technologies, I had also the role of Internet Marketing consultant and seminar speaker and have led small teams of web developers and content makers.*

*I am convinced that I possess the proper qualities and qualifications to respond effectively to the requirements of various companies or projects. Building bridges for quality & performance, between professionals from different departments and technical understanding is my top skill and my biggest ambition.*

Yours faithfully  
Nomikos Strigkos
